Nahuel Solveira

Backend / Fullstack Developer

San Luis, Argentina · nahuel.solveira@gmail.com · linkedin.com/in/nahuel-solveira · github.com/Nahuel3006 · nahuel3006.github.io

PROFESSIONAL SUMMARY

Software developer with 4+ years of experience in ERP systems (Microsoft Dynamics 365 Finance & Operations): X++, C#, SQL Server, API integrations, performance optimization and automation. Promoted twice in 3 years. Expanding my stack to Node.js and React and looking for a backend or fullstack role.

TECHNICAL SKILLS

Languages: X++, C#, SQL, JavaScript. Basic knowledge: Java, C, Python
Backend & web: Node.js, React, REST APIs, HTML, CSS
Data & formats: SQL Server, JSON, XML, CSV
Platforms & tools: Dynamics 365 Finance & Operations (D365 F&O), Electronic Reporting (ER), Lifecycle Services (LCS), Azure DevOps, Azure Key Vault, Azure Portal, Git, GitHub, Postman, Visual Studio, VS Code
Methodologies: Agile methodologies, unit testing, code migration, bug fixing

PROFESSIONAL EXPERIENCE

AW LATAM (Official Microsoft Partner) · Argentina (Remote) · June 2022 – August 2026
Semi-Senior Developer (July 2025 – August 2026) · Junior Developer (July 2023 – July 2025) · Young Professional (June 2022 – June 2023)

- Promoted twice in 3 years: Young Professional, Junior Developer and Semi-Senior Developer.
- Cut the execution time of electronic reports in D365 F&O from hours to ~10 minutes by optimizing the Electronic Reporting (ER) configuration and the X++ code that supplied the data.
- Redesigned a feature processing 10,000+ records to run in the background, eliminating timeouts and user wait time.
- Served as technical point of contact for Argentina's e-invoicing module (ARCA, formerly AFIP), working with the intermediary API team to resolve blockers and deliver new features.
- Extended native D365 F&O functionality for 5 LATAM countries (AR, CL, PE and others): electronic reports, inflation and tax calculations, and document fiscalization.
- Extended and updated the open-source ISVLicenseGenerator project with a CLI mode (C#/.NET) and, through reverse engineering, adapted it to a new software version using a certificate stored in Azure Key Vault, improving security and removing manual steps in ISV license generation.
- Took over and fixed the Excel add-ins for importing and exporting accounting-ledger data, supporting other teams with similar processes.
- Reorganized ISV roles and privileges by module to match daily use, and delivered an internal training session.
- Analyzed and resolved bugs, and migrated code between solutions and D365 F&O modules.

PROJECTS

ISV License Generator – CLI — fork of aariste/ISVLicenseGenerator with CLI support to automate ISV license generation. C#, .NET, CLI. github.com/Nahuel3006/ISVLicenseGenerator_CLI

Fullstack Diploma projects — Café Serrano (website and barista school) and About Us page. JavaScript, Bootstrap, fetch API, async/await, form validation.

More projects, demos and repositories — nahuel3006.github.io · github.com/Nahuel3006

EDUCATION & CERTIFICATIONS

Fullstack Development Diploma with React, NodeJS and AI Tools — UNSL (in progress)

Computer Engineering — National University of San Luis (UNSL), partial studies, 2015–2020

Software Programmer — University of La Punta (ULP), partial studies, 2017

freeCodeCamp (2022–2023): Back End and APIs, Front End Libraries, JavaScript Algorithms and Data Structures, Responsive Web Design, Data Visualization

LANGUAGES

Spanish: native · English: advanced, CEFR C1 (Centro Universitario de Idiomas, UNSL). Daily meetings in English with Microsoft staff.

OTHER EXPERIENCE

Systems & IT support (freelance), August 2020 – Present: hardware and software troubleshooting, diagnostics and repairs.
